

Possible human trap ideas. Vol 1

Food

①

Use sugar to distract them. Effects last ~10m, set fast. Recommend baseball bat to the head. Then insert brainworm for control.

②

Curiosity

Lure them with shiny objects or puzzles placed around animal traps. Temporarily unable to move. Set fast. Baseball bat not good. Try a potato sack for transport.

③

Technology

Attack during lunch. About 1-2 min after sitting down smartphones appear. Use chloroform to take them out one at a time. No violence needed - you are like a ninja. No one sees you.

④

YouTube

Show them funny videos of kittens, sloths, turtles etc. Make a playlist to play on town square. Really good mass-hypnosis potential.
